

# WHAT IS ULTRASONIC CLEANING?

Ultrasonic cleaning is the process of using sound waves to agitate a liquid, producing **cavitation bubbles**. These bubbles implode on contact with surfaces at 1000°F and 1000psi, breaking up hard to remove particles with precision and efficiency.

Our mobile units are equipped with a gas fed tankless water heater, power generator, air compressor and a 8 foot 50 gallon, dual chamber ultrasonic cleaning tank. Should your site not have access to water, our unit is equipped with on board tanks to handle the job.

# WHY ULTRASONICS FOR YOUR BLINDS?

Even if you regularly clean your blinds, simply wiping the surface fails to eliminate tough to remove particles, including harmful allergens. This method also pushes dirt to the strings creating stains. Conventional wiping and dusting creates static electricity which in turn starts attracting dust. Ultrasonics deep clean slats, strings and mechanisms leaving a dust resistant coating and an unmatched end product.

## MOBILE ULTRASONIC CLEANING

## A LOCAL OKANAGAN CRAFT

Since our founding, in 2018, we've worked with numerous clients throughout the Okanagan.

We complete projects efficiently, on schedule, and go above and beyond to form lasting relationships with our clients.

We know that great service begins and ends with experienced and friendly professionals, which is why we put so much consideration into selecting our teammates.

## ON-SITE SERVICES

- Horizontal Blinds
  - Fabric Shades
  - Vertical Slats
  - Custom Shades
  - Ultrasonic Bath
  - Injection Extraction
  - Power Rinse
  - Power Dry
- **Cost Effective** - reduces the need for replacing blinds. Shaves pointless conventional cleaning hours.
  - **Efficient** - on-site remove, clean, return.
  - **Hygienic** - eliminates harmful allergens and unseen bacteria.
  - **Eco-Friendly** - uses aqueous solutions. No solvents or chemicals.

## COMMERCIAL

Up until recently, dusting and wiping window blinds has been the industry standard in commercial blind cleaning.

Institutions that require their public areas to be free of allergens and bacteria specifically request ultra sonic cleaning when addressing dirty window blinds.

Schools, hospitals, medical offices and restaurants are all looking to provide a more sterile environment for their visitors.

Ultrasonics have the ability to remove 99.9% of contaminants while leaving nothing behind. It is the most efficient way to clean where we can't see.

Our mobile ultrasonic cleaning systems provide industry leading ultrasonic cleaning service on site and make month end move in/outs a breeze for our property managers. No more waiting for blinds to be returned at a later time. We offer full range services including repair and replacement for our commercial clients.

Contact us today and ask how we can help you save on labour costs all while providing a clean, safe environment in your facilities.
